#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) ☒ Responsive to communication(s) filed on 26 March 2004.
- 2a) ☐ This action is **FINAL**.      2b) ☒ This action is non-final.

## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-10, drawn to an implantable device for external effecting perfusion of oxygenated blood into myocardial tissue from a left ventricle, including a shaft with an aperture, the aperture being coated with a substance that elutes from the aperture, classified in class 604, subclass 8.
  - II. Claims 11-20, drawn to a method of treating an ischemic myocardium, including steps of identifying a subject, inserting a perfusion device into the subject's myocardial tissue such that oxygenated blood is perfused into the myocardial tissue from the left ventricle, and inserting the device using an insertion tool, classified in class 128, subclass 898.
2. The inventions are distinct, each from the other because:
3. Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the processes of Group II

could be practiced with a product that does not include the aperture being coated with a substance that elutes from the aperture.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

5. Claim 1 is generic to a plurality of disclosed patentably distinct species of the claimed invention, comprising:

**Species A: a device in which the shaft is U-shaped**, as generically disclosed in Claim 1 and exemplified by specie of Claim 3.

**Species B: a device in which the shaft is straight**, as generically disclosed in Claim 1 and exemplified by specie of Claim 4.

**Species C-F: a device in which the substance is (C) an antibody that binds to endothelial cells, (D) an inducer of angiogenesis which is human vascular endothelial growth factor, (E) an antiplatelet agent, or (F) an antithrombin agent**, as generically disclosed in Claim 1 and exemplified by species of Claims 7, 8, and 9.

6. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

7. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

8. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

### ***Conclusion***

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Paula L. Craig whose telephone number is (571) 272-5964. The examiner can normally be reached on 8:30AM-5:00PM M-F.

10. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Tanya Zalukaeva can be reached on (571) 272-1115. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
